

## Community Covid-19 Response

## Community Covid-19 Response Second Round

Project commenced April 2021 and ended June 2021

Sheffield city council awarded United Women Affiliation a short term second round covid-19 response to continue supporting the most hit population with covid pandemic consequences. The funds acknowledge voluntary and community sector commitment and support that they provided reaching out the deprived and city-wide population with education, support, assistance and encouragements to reducing the spreading of the virus and protecting people from covid-19 pandemic illness and death.

### Expected Outcome

- Preventing the spread of covid-19
- Outbreak control and encouraging testing
- Supporting people to self-isolate
- Supporting covid-19 vaccination uptake

### Activities

1. Reinforcement of government covid-19 preventions to the families and individuals using other native language (Swahili, Lingala, and Kinyarwanda-Rwandese).
2. Provide translated information to ensure better understanding of the government and public health promotion messages.
3. Influence positive action and practices to the seldom heard families and individual
4. Raise awareness that some people can have no symptoms but can be positive so emphasizing on testing and stay safe slogan
5. Help and support people to test and self-isolate if they are testing positive.
6. Correct myth about covid-19 pandemic and spreading.
7. Support people to follow good practice in prevention, hand washing and face mask wearing
8. Provided series of public health education awareness and health promotion trainings for people with language barrier
9. Support families and peers to reach out the seldom heard families
